

Please do not invalidate Wisconsin's No Call List. I signed up for the No Call list as soon as I was able 2 years ago in order to stop the insane amount of phone calls I was receiving on a daily basis which was between 4 and 8 calls per night. I am appalled that the FCC would consider the rights of for-profit business over the rights of private citizens. My quality of life has improved considerably since the calls have stopped and I have started answering my phone once again without the threat of being badgered into some sort of sales pitch. If I choose to do business with a particular company, I will make that decision on my own and will contact them as I believe it should be. I would ask that the FCC not weaken Wisconsin's No Call list and promote a better life for those of us who live here.
